

ALPHA-Marking Device
the indispensable tool for carpenters,
builders and stairs

- The Marking device is made of hardened spring steel, material dimensions 1,4 mm.
- Welded design, with ground upright rectangular edges, permitting optimum rest. No disturbing offsets or projecting edges.
- The protractor can be taken off and can be fixed on both sides of the square. Can be used with the right or left hand.
- Through the scales on the both blades of the protractor measurements can be transferred direct from the device.
- Without the protractor, the ALPHA-Marking device is a square with graduation on both blades.

The ALPHA-Marking device is an angle, adjustable square and protractor in one tool. It is the right tool for marking.

**A quality product
of stainless steel**
